

The perfect image for every mood.
With the KREIOS® G1 LED image projector.

Powerful images, vivid words. KREIOS® G1.

Whether in the retail trade, at exhibitions or in restaurants, bars and clubs – numerous application fields call for exceptional advertising that attracts attention and is versatile. The 1.5 kg lightweight LED image projector KREIOS® G1 offers this opportunity: using standard or self-made gobos, it projects brand names, logos and other messages with high brightness and brilliant sharpness onto walls, floors and objects. For more convenience, image motifs can be exchanged easily and quickly.

Thanks to the high-power LED light source and an optimized optical system, the KREIOS® G1 delivers a crystal-clear outline of the gobo with a homogeneous distribution of light across the entire image. Compared to conventional gobo projectors, its energy efficiency is increased by up to two-thirds: its LED light source is able to replace a conventional 75 W halogen lamp using only 24 W. Moreover, it has a very long lifetime, thus making the KREIOS® G1 a reliable solution for professional continuous operation.

KREIOS® G1 LED IMAGE PROJECTOR

Bright, sharp, lightweight ...

All benefits at a glance:

- Bright and uniformly illuminated image
- Compact construction, awarded design
- Light weight
- Low energy consumption
- Low heat output, no active cooling needed, no noise
- No UV/IR filters needed
- Easy access for gobo replacement
- Easy to install
- Long-life LED (up to 30,000 h)
- Manual pan (270°) and tilt (120°) adjustment
- Maximum ambient temperature 36 °C
- CE/UL listed
- 2-year guarantee (guarantee conditions available at www.osram.com/guarantee)

Body color: black or white

Weight: 1.5 kg

Dimensions: 265 x 80 x 70 mm

Size of projected image:

0.3 to 1.4 m (see page 8)

Scope of delivery:

- 1 KREIOS® G1 LED image projector
- 1 mounting plate
- 2 gobo holders
- 1 power cord without plug
- 2 gobo samples

Track mount version also available on request.

It's so easy:
changing gobos in
seconds.

The easy-to-open fixation ring (above) and magnets (below) of the gobo holder allow for fast replacement and high stability.

The gobo holder is attached to the projector in no time at all.

KREIOS® G1 LED IMAGE PROJECTOR

The projected image is as bright and crisp as that of a 75 W halogen projector – and this with only 24 W.

Beam angle 16°

KREIOS® G1 Design Possibilities

	HOMOGENEITY	EDGE QUALITY	COLORS	LIFETIME
Self-printed gobos				
Laserjet printer (transparency)	•	•	•	••
Inkjet printer (artwork film)	•••	•••	••	••
Professional gobos				
Exposure on filmstrip	•••	••	••	•
Print on transparency	•••	•••	•••	••
Glass gobo	••••	••••	••••	••••
Metal gobo	••••	••••	•••	••••

Thanks to its low heat output, the KREIOS® G1 allows the use of quick and easy self-designed gobos, which are printed on transparencies. For professional continuous operation, however, standard glass or metal gobos are recommended. These gobos are more expensive, but produce a vivid image with extra long service life and superb quality.

The KREIOS® G1 looks sharp anywhere.

Thanks to its low weight and compact dimensions, the KREIOS® G1 can easily and quickly be mounted on walls, ceilings or floors. The LED image projector allows adjustment with a tilt of 120° and a pan of 270°. The location of the projection can thus be changed flexibly without the need to reposition the projector. In addition, the low heat output makes active cooling, as for instance with a fan, no longer necessary. As a result, the projector is absolutely silent during operation.

The KREIOS® G1 is ideally suited for various kinds of projections in:

- Airports
- Bars
- Museums
- Restaurants
- Retail outlets
- Special venues
- And other architectural settings

For more information on the KREIOS® G1, please go to:
www.osram.com

If the customers' attention is guided by effective projections, no special offer stays unnoticed.

Whether bar or VIP lounge – the KREIOS® G1 provides an elegant way to designate and distinguish areas.
