

SōLARC® REFERENCE GUIDE

High-Intensity Arc Lamp Technology

USHIO's genuine patented Sōlarc® lamp technology combines the efficiencies of high-pressure metal halide arc lamps, precision miniature lamp construction for precise optical alignment. This unique process delivers unequalled illumination performance for intense, brilliant white light with a color temperature typically greater than 5,000K — comparable to true daylight. Please use this reference guide for typical Sōlarc component replacements to consistently meet market demands.
